Our Dataset

World Bank

Millennium Development Goals

2006-2015

1. To eradicate extreme poverty and hunger
2. To achieve universal primary education
3. To promote gender equality and empower women
4. To reduce child mortality
5. To improve maternal health
6. To combat HIV/AIDS, malaria, and other diseases
7. To ensure environmental sustainability
8. To develop a global partnership for development

Our Dataset

World Bank

Millennium Development Goals Databank

https://databank.worldbank.org/source/millennium-development-goals

132 variables over **10 years**

263 countries and **regional groupings**

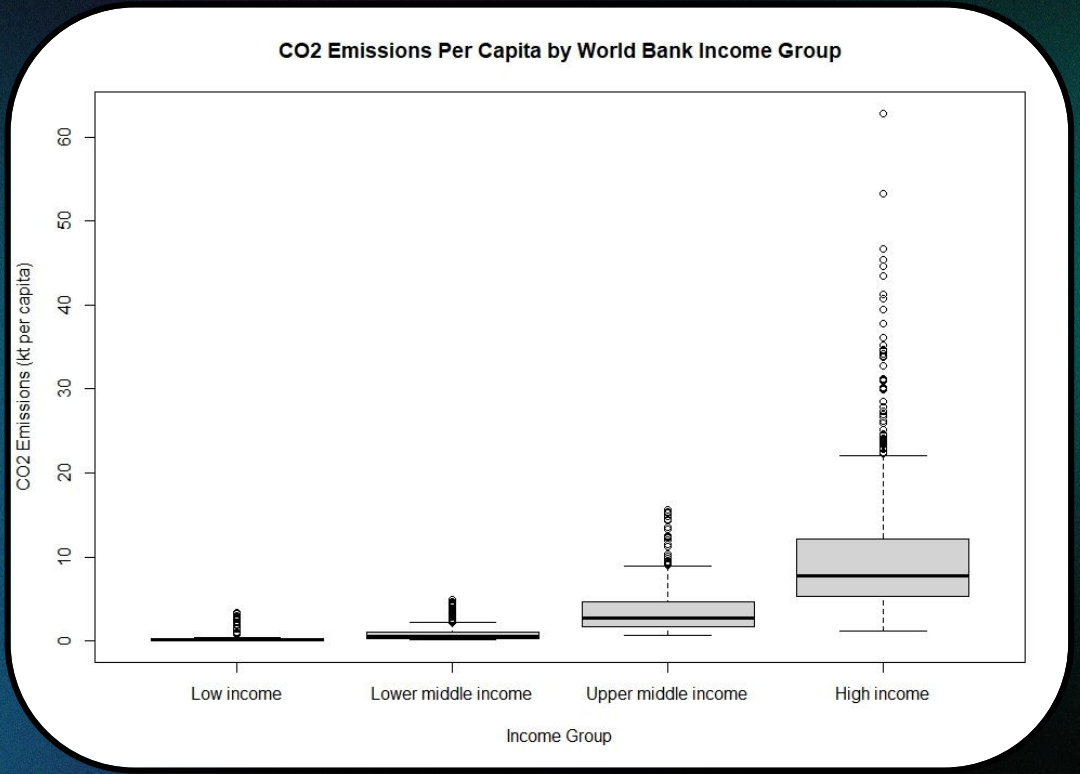
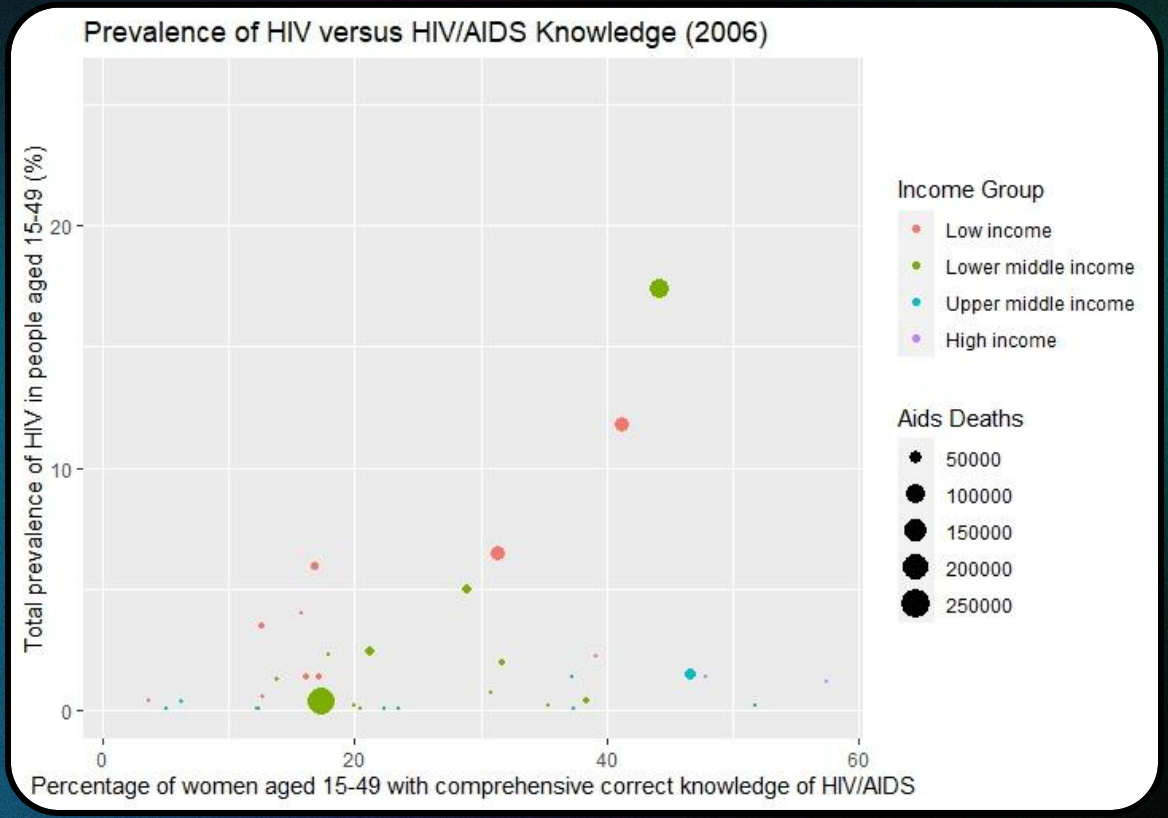
Sample Research Question

How do national per-capita CO_2 emissions vary by World Bank income classifications?



Sample Research Question

What is the relationship between comprehensive correct knowledge about HIV/AIDS and HIV prevalence?



Your Task Today

TASKS

- Explore the dataset (suggestion: start with metadata!)
- Develop a research question about global factors affecting economic development
- Apply appropriate data visualization and statistical techniques
- Draw valid conclusions about your questions
- Create an attractive visualization display (to show on a team member's laptop at your table)

RULES

You MAY use (and cite!) additional sources to supplement the dataset.

You MAY consult external sources on "how to do X" in your preferred coding language.

You MAY NOT use prior or existing analyses of these data.

Questions? We're here to help!

Evaluation Criteria

Research Question

Is the research question clear and narrowly scoped? Can it be addressed with the available data?

Result Clarity

Are the conclusions from the analysis clear? Are visualizations and summaries easy to interpret?

Statistical Methods

Are the approaches to fitting and modeling appropriate? Do they correspond to the core claim?

Impact

Do the results of this work communicate something meaningful to the intended audience?

Visualization Approach

Is the visualization approach and configuration appropriate for the data being presented?

Creativity

Are the question and approach original, or show depth of thinking about the dataset and its context?
